Science helps us understand the world in which we all live. Science inspires us, leads us to progress, and shapes the issues affecting our daily lives. In this new podcast from the University of Florida, Center for Public Issues Education, we're exploring the science of many different issues related to agriculture, natural resources, and public health. It's called Science by the Slice. In this podcast from the PIE Center, as we're better known, part of the University of Florida's Institute of Food and Agricultural Sciences, experts will cut into diverse topics, present the research, and tell you what they know. We'll talk about such topics as the COVID-19 pandemic, natural disasters, agricultural economics, forestry, and so much more. Subscribe wherever you get your podcasts. Science by the Slice, piecing together the science of our lives.
